

When the privacy of spoken information is critical in your environment, depend on the iMask system. It's a ceiling tile or surface mounted solution capable of conditioning multiple offices or areas.

- Low voltage, plug-&-play system
- Quieter and less intrusive, yet significantly improves speech privacy
- Multi-channel system accurately simulates the sound of a high quality HVAC system
- Provides a sound spectrum that delivers uniformly throughout the coverage area
- Truly independent control of sound-masking levels in open and closed office areas
- Retro-fit into existing facilities with little disruption

The iMask system fulfills requirements of the Gramm-Leach-Bliley Act (GLB Act)
