

iTouch™

iTouch kiosks are a revolutionary solution for easy to implement, self-service touchscreen applications. Key to the iTouch product line is a powerful, yet flexible, universal software integrated across a variety of reliable hardware configurations. Whether your objective is to provide targeted access to your website and other information, or offer a variety of payment options for online shopping, donation collection or other self-directed experience, iTouch interactive solutions are versatile and effective tools that will appeal to users from all demographics.

And, with inLighten's user-friendly online content management interface, clients can create and schedule powerful digital signage content to play during kiosk idle time.

The iTouch product line offers a variety of standard hardware configurations and the flexibility to utilize the iTouch-X Server in the design of a custom kiosk to meet the needs of any special self-service application.
